

A sea lion pup recognizes its mothers call, even with thousands of other noisy sea lions about. A vervet monkey shouts 'ha-ha-ha' to warn of an eagle passing overhead. A peacock fans its colourful tail feathers in a silent but impressive display to entice a peahen. Whether its to attract a mate, warn of predators or mark their territory, animals share information in some extraordinary ways. Containing lots of interesting facts, activities and easy-to-do experiments, this title in the Animal Behavior series takes a resourceful approach to exploring animal life.

Hippos, whales and elephants communicate with sound so low that humans can't hear Animal Talk: How Animals Communicate Through Sight, Sound and Smell Animal Talk, Animal Groups and other titles in the Animal Behavior series. Auditory communication is widely used in the animal kingdom. Auditory communication is particularly important in birds, who use sounds to convey warnings, attract mates, defend territories, and coordinate group behaviors. In some frog species, the sounds can be heard up to a mile away!.
