

Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice. Audio-Digest Orthopaedics is specifically designed to provide the participant with state-of-the-art information on, including, but not limited to, the diagnosis and management of: Upper extremity disorders Fractures Dislocations Total joint arthroplasty Orthopaedic infections Spinal disorders Orthopaedic trauma Tumors of the bone and soft tissues Sports medicine Congenital anomalies Nontraumatic bone and joint disorders Foot disorders Nervous system disorders The goal of this program is to improve surgical outcomes of reverse total shoulder arthroplasty (TSA) and rehabilitative outcomes for procedures to correct shoulder instability. After hearing and assimilating this program, the clinician will be better able to: 1: Cite the indications for reverse TSA in fracture management. 2: Explain the advantages and potential problems associated with reverse shoulder arthroplasty. 3: Discuss a technique for performing reverse TSA after a previous hemiarthroplasty in patients with glenoid bone loss. 4: List several recommended technical pearls for performing a successful reverse TSA. 5: Describe the general protocol for progression through rehabilitation therapy after surgery for shoulder instability.
